

Stage Production Electronic Sign

Sign designed for ELVIS tribute concerts. Each letter is individually lit with controls to flash on and off. 680 Bulbs - Each screw in LED bulb has 3 red heavy duty, extra bright leds. Christmas Screw-in Bulbs

Each letter weighs 25 pounds

Pole set-up kit included. Included in the kit:

3) 7' upright poles that extend to 12' tall

* Comes with weighted bases for poles to sit in for stability

2) 6' poles that connect to the (3) upright poles

* 6 padded chairs are needed but are not included

1) 6 outlet - RS-232 controller

1 6 push button controller

1) 100 foot RS-232 patch cord

* 6) extension cords are needed to plug into the controller on the stage

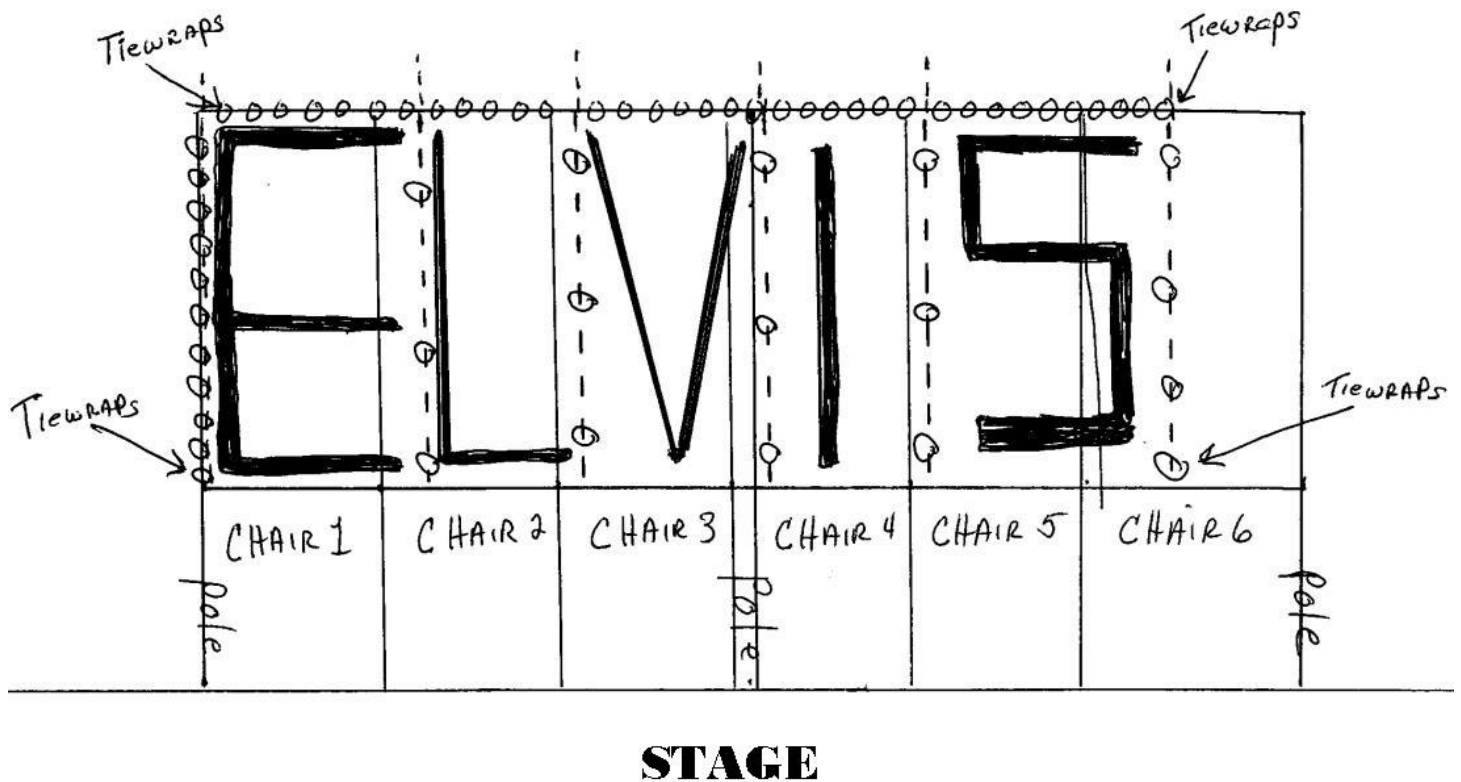

• Set up time....25 minutes

- **STEP 1** Put 3 poles and bases on stage spaced apart 8 feet
- **STEP 2** Connect to connector poles between the base poles
- **STEP 3** Place 6 padded chairs on the stage under poles.
- **STEP 4** Start with the letter “E” sign at the end and place it on the chair....leaning against the top pole. Using black tie wraps, secure the top of peg board sign to the pole it is leaning against.

- **STEP 5** The letter “L” sign is next, place it on the chair...leaning against the top pole. Using black tie wraps, secure the top of peg board sign to the pole it is leaning against.
- **STEP 6** The letter “V” sign is next, place it on the chair...leaning against the top pole. Using black tie wraps, secure the top of peg board sign to the pole it is leaning against.
- **STEP 7** The letter “I” sign is next, place it on the chair...leaning against the top pole. Using black tie wraps, secure the top of peg board sign to the pole it is leaning against.
- **STEP 8** The letter “S” sign is next, place it on the chair...leaning against the top pole. Using black tie wraps, secure the top of peg board sign to the pole it is leaning against.
- **STEP 9** Attach extension cords to each of the letters
(6 cords are needed...does not come in kit)
- **STEP 10** Plug the cords into the RS-232 data box in order
E =1, L =2, V =3, I =4, S =5
- **STEP 11** Plug the white 100 foot RS-232 cord into the DATA BOX and run the cord off stage to where you will control the lighting from.
- **STEP 12** Place your 8 button controller on the table and plug it into a power outlet. Connect the end of the 100 foot RS-232 cord to the 8 button controller

You are now ready to use your beautiful sign. Play with the buttons....you will find NO delay with the on and off of the buttons. Have fun !!!
